Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to apparatus, but are claiming several method limitations. This is not improper, however, Applicant is connecting the elements through the "method limitations" rather than through structural elements, e.g. "a first screw for mixing said sterilized mass". "A first screw connected to the tower" would be clearer. The "sterilized mass" is not a structural limitation. The claim would be clearer if written in means plus function form. Such a claim would be allowable over the art of record.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2,265,918 in view of BLANCHETTE et al (5,055,159).

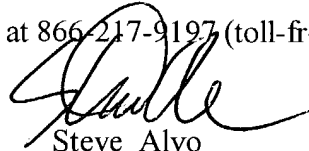

GB 2,265,918 teaches many of the claimed structural elements, e.g. see screws (10) and (17); reaction chambers (1) and (12); pulper (11). BLANCHETTE et al teaches pretreating lignocellulosic material with an inoculum in a tower prior to pulp digestion to reduce energy. It would have been obvious to pretreat the pulp of GB 2,265,918 in a tower prior to digesting and refining, e.g. in shredder (11) to reduce the amount of refining energy in the manner taught by BLANCHETTE et al.

The claims are drawn to apparatus yet contain many method limitations which are not obvious over the art of record. Claims 1-3 would be allowable over the art of record if amended to include means plus function terminology, e.g. "a tower means for"; "a first screw means for"; "a hydraulic pulper having means for"; "a hammer mill means for"; "a rotating tumbler means for"; "a rotor compactor means for"; "a second screw means for" and "apparatus means for". Also the second to last line, after "bleaching" the term "said second conditioned and reacted vegetative mass" should be added.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve Alvo whose telephone number is 571-272-1185. The examiner can normally be reached on 6:00 AM to 2:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
